INVESTMENT PHILOSOPHY

The Fund practices morally responsible investing. This process is designed to avoid investments in companies believed to offer products or services or engage in practices that are contrary to core values and teachings of the Roman Catholic Church. The Catholic Advisory Board sets the criteria for screening out companies based on religious principles.

MORAL SCREENS

Our moral screens eliminate companies engaged in:

BUY DISCIPLINE

Adviser favors:

- Companies with attractive valuations based on cash flow, earnings, dividends, book and asset value
- Strong historical and prospective growth potential
- Operational, managerial, or strategic catalysts that enhance shareholder value

SELL DISCIPLINE

Stocks are sold when:

- Price exceeds our estimate of intrinsic value
- Company fails to achieve expected financial results
- Economic factors or competitive developments adversely impair the company's value
- Company becomes a violator of any moral screen established by the Catholic Advisory Board

¹ Fund holdings are for illustrative purposes, subject to change and should not be considered a recommendation to buy or sell securities. Current and future portfolio holdings are subject to risk.

The Adviser invests only in securities that meet the Fund's investment and religious requirements. The returns may be lower or higher than if decisions were based solely on investment considerations. The method of security selection may or may not be successful and the Fund may underperform or outperform the stock market as a whole. All mutual funds are subject to market risk, including possible loss of principal. The Fund's investments in small- and mid-capitalization companies could experience greater volatility than investments in large-capitalization companies. Price/Earnings ratio (P/E ratio) is a valuation ratio of a company's current share price compared to its per-share earnings. P/E equals a company's market value per share divided by earnings per share. Forecasted P/E is not intended to be a forecast of the fund's future performance. Annual Turnover Ratio is the percentage of the fund's assets that have changed over the last twelve months. Mutual funds with higher turnover ratios tend to be less tax efficient and have higher transactional costs.

Investment performance assumes reinvestment of dividends and capital gains distributions. Performance data reflects certain fee waivers and reimbursements. Without such waivers, performance would have been lower. The S&P 400® Midcap Index is an unmanaged index created by Standard & Poor's made up of 400 midcap companies. The index is the most widely used index for mid-sized companies. The S&P 500® Index is a capitalization weighted unmanaged index of 500 widely traded stocks, created by Standard & Poor's. The index is considered to represent the performance of the stock market in general. Indexes do not incur fees and it is not possible to invest directly in an index.

Request a prospectus, which includes objectives, risks, fees, charges and expenses and other information that you should read and consider carefully before investing. The prospectus can be obtained by calling 1-866-283-6274 or online at www.avemariafunds.com. Distributed by Ultimus Fund Distributors, LLC.
