Adviser invests only in securities that meet the Fund's investment and religious requirements. Returns may be lower or higher than if decisions were based solely on investment considerations. The method of security selection may or may not be successful and the Fund may underperform or outperform the stock market as a whole. All mutual funds are subject to market risk, including possible loss of principal. The Fund's investments in small- and mid-capitalization companies could experience greater volatility than investments in large-capitalization companies. The Fund invests primarily in fixed income securities and as a result the Fund is also subject to the following risks: interest rate risk, credit risk, credit rating risk and liquidity risk. Investment performance assumes reinvestment of dividends and capital gains distributions. Performance data reflects certain fee waivers and reimbursements. Without such waivers, performance would have been lower. Bloomberg Intermediate US Gov/Credit Index is the benchmark index used for comparative purposes for this fund. Indexes do not incur fees and it is not possible to invest directly in an index.
